

Dylan Lopez Guzman

Medellin, Colombia · [linkedin.com/in/dylan/](https://www.linkedin.com/in/dylan/) · +57 3234355998 · dylanlogu03@gmail.com

Adaptable Full-Stack Web Developer with added experience in DevOps environments, especially WHM/cPanel-based server management. Known for stepping outside typical dev duties to resolve high-stakes infrastructure issues when support was lacking. Strong background in PHP/React applications, WordPress maintenance, and real-time debugging of production environments.

Professional Experience

Agenda Consulting

Full Stack Developer &
Webmaster

Virginia, United States

September 2024 – September 2025

- Provided critical DevOps support after multiple team members were let go, despite no prior background in the area. Took initiative to investigate and fix server-side issues through WHM/cPanel, often resolving problems caused by former senior engineers.
- Built and maintained features using React and NodeJS (MERN stack). Responsible for troubleshooting and resolving issues across the stack, improving performance and user experience. Also served as a merge request validator, reviewing code for quality, functionality, and adherence to standards before deployment.
- Built and maintained custom Wordpress sites, performed PHP tweaks and REST API integrations, handled complex multi-site migrations, resolved migration related failures, and managed version controlled theme/plugin updates. Experienced in hardening security, mitigating attacks, and restoring compromised sites. Also responsible for automated backups and ongoing maintenance.
- Collaborated with leadership on infrastructure fixes, diagnosing server problems and relaying Cloudflare level actions needed to decision makers.
- Validated a patch for Five Guys' internal inventory & store-control platform, restoring real time stock visibility across 100 + locations.

20S Agencia

Full Stack Developer

Medellin, Colombia

February 2024 – March 2024

- Led the development of a web-based quotation tool for the Tuyomotor automotive agency, covering both frontend and backend functionalities. This project included implementing interactive features and integrating backend systems to process real-time quotations.
- Worked on various frontend development projects, enhancing user experience through responsive design implementation and web performance optimization.
- Identified opportunities to optimize workflow and reduce project delivery times, proposing the adoption of agile methodologies to improve team collaboration, client communication, and delivery efficiency.

Consentidohumano S.A.S.
Frontend Developer

Medellin, Colombia
October 2021 – November 2021

- Developed and implemented an innovative design prototype for the company's website, aiming to improve user experience and optimize site functionality. The new design significantly enhanced navigation.
